

Updated Visitation Protocols for Conrad House Beginning May 17, 2021

There are lots of new questions circulating about the protocols for Conrad House since the Center for Disease Control (CDC) lifted some of the mask precautions for persons who have been COVID vaccinated. People who have been vaccinated are no longer required to wear masks outdoors or indoors in common areas or in groups on vaccinated people. Residents who are NOT VACCINATED must still wear a mask when outside their apartments. But due to so many Conrad House residents having chronic serious health issues, we are still recommending that ALL RESIDENTS AND VISITORS continue to wear mask in common areas! This CDC directive does not include hospitals and other health care facilities such as Ball Pavilion and Barnabas Court. Their restrictions are still more strict.

We encourage all family members and other visitors who want to visit Conrad House to be Covid vaccinated and to register their proof of vaccination with Brevillier Village.

FOR VISITATION AT CONRAD HOUSE:

There will be a kiosk in the Conrad House foyer for screening of all guests just like the one that was used when visitors when to Ball Pavilion. Visitors can report directly to Conrad House where they will need to use the kiosk for their screening. After the process is complete, the CH resident must come down and meet their visitors at the front door to let them in. In another week or so, we will have the console working in

the lobby so visitors can connect with their resident and be buzzed in by them.

All non- vaccinated visitors must still wear full PPE (mask, gown, gloves) while visiting at Conrad House. All visitors must go directly to the resident's apartment. They are not allowed in the common areas such as the Chat room or MPR. They are not allowed to stop and visit other residents. Children will be allowed to come in, 2 at a time with an adult, for a total of 3 guests at a time. They must go directly to the resident's apartment and stay there for the entire visit. They should not be outside on the grounds.

ISOLATION/QUARANTINE PROTOCOLS-

-14 day isolation is still required for anyone who has not been vaccinated and who comes from home, hospital, including ER, or from vacation in another state.

-For vaccinated residents- there will be no isolation needed after an emergency room visit, and only a 7 day isolation of coming from a private home, hospital stay or vacation.

GATHERINGS-

Any gatherings of residents within Conrad House must be limited to 25 people and masks must be worn by unvaccinated residents

If you have any questions, please see Jenn S. or Jen K. in the Conrad House office.

We continue to encourage you to be smart and be safe to keep everyone safe!!
